

Manage your entire restaurant or food service business with

# LS Central for restaurants

## Tired of using many software solutions to manage your food service operations?

LS Central extends Microsoft Dynamics 365 Business Central ERP with functionality for restaurant and food service businesses, communicating seamlessly from front to back as a **single software solution**. Leverage all the functionality LS Central and Business Central have to offer, when and where you need it, **without complex integrations**.

### 👍 Unify all your data and business processes

including sales, financials, inventory, customer information, replenishment, self-service ordering, and loyalty with a single system.

### 👍 Update prices and promotions centrally

and automatically send changes to all your physical and digital menus and points of sale.

### 👍 Manage more than just food:

handle retail items, cooking classes, pop-ups, and more, with the same software.

## Serve customers faster and better

- With your Kitchen Display Systems (KDS) or kitchen printers **communicating directly to the POS** you can ensure dishes get delivered to your guests on time.
- Let front of house employees **check the progress of orders** straight at the POS and save time.
- **Manage tables and reservations** to seat guests quickly and efficiently.
- Keep track of **guest preferences, allergies, and modifications** easily at the POS and in the kitchen.

## Effectively manage inventory across your chain

- Add your recipes to the system and let it **automatically deduct the correct amount of ingredients** every time you sell a dish.
- See available ingredients in **real-time** across all your locations and automate replenishment.
- Monitor sales, purchasing, and stock levels to **minimize waste** and only reorder what you need.

## Empower guests and encourage loyalty

- Let customers place orders with **self-service kiosks, QR codes, app, website, or tablets at the table**.
- Build an **effective loyalty program** and offer personalized rewards or deals catered to customer preferences.
- Keep track of **customer purchasing habits** to plan promotions, happy hour, specials, and more in some or all your locations.
